Our Birth Partnership

At Women & Infants Hospital, we know how important it is to support your birth preferences while maintaining a safe outcome and positive experience for you and your family. We want to partner with you and your family during your pregnancy to learn about what is most important to you. We encourage you to talk with your care provider about your preferences over the course of your pregnancy, and work together to create and update your birth partnership as your delivery approaches.

My name is: ____________________________  I prefer to be called: ____________________________

My labors support people are: ____________________________________________________________
